## MONSTROUS ARCANUM

WARSCROLLS  
COMPENDIUM

# INTRODUCTION

Far from the bastions of civilisation, the world-that-was was the domain of monsters and strange creatures of nearly limitless forms and macabre power. From the broken wastes to the deep and fetid swamps, and from the

perilous depths to the chill mountains, it was these great beasts that ruled in elder days, and the best that the feeble arts of mankind could do was record their legends in works known as the great *Monstrous Arcana*.

The warscrolls in this compendium allow you to use your Warhammer Forge collection in fantastical battle, whether telling epic stories set during the Age of Sigmar, or recreating the wars of the world-that-was.

## WARSCROLL KEY

- Title:** The name of the model that the warscroll describes.
- Characteristics:** This set of characteristics tells you how fast, powerful and brave the model is, and how effective its weapons are.
- Description:** The description tells you what weapons the model can be armed with, and what upgrades (if any) it can be given. The description will also tell you if the model is fielded on its own as a single model, or as part of a unit. If the model is fielded as part of a unit, then the description will say how many models the unit should have (if you don't have enough models to field a unit, you can still field one unit with as many models as you have available).
- Abilities:** These are things that the model can do during a game that are not covered by the standard game rules.
- Keywords:** All models have a list of keywords. Sometimes a rule will say that it only applies to models that have a specific keyword.
- Damage Table:** Some models have a damage table that is used to determine one or more of the model's characteristics. Look up the number of wounds the model has suffered to find the value of the characteristic in question.

**3 DESCRIPTION**  
A Preyton is a single model. Twisted creatures of Chaos, Preytors are hateful and cunning beasts that delight in capture and killing on its own side. They possess powerfully venomous saliva which drips from their fangs instantly and which they can also spit at their enemies to blind and agonise them as they are helpless before their onslaught. When they attack, and serrated suffer to crash into their foe before falling upon them with their vicious fangs.

**4 FLY**  
Preyton can fly on their leathery wings.

**5 KEYWORDS** CHAOS, MONSTERS OF CHAOS, MONSTER, PREYTON

**ABILITIES**  
**Blinding Bile:** If a unit suffers wounds from a Preyton's Blinding Bile attack, you must subtract 1 from its Bravery until your next hero phase.  
**Garotting Charge:** Whenever a Preyton charges into combat, it inflicts 2 mortal wounds on the unit it has charged at at the beginning of the combat phase. It will then go on to attack normally.  
**Apocrying Venom:** Should a model suffer wounds from a Preyton's Venom-dripping combat phase roll a D6. On a result of a 4+, the model suffers a mortal wound as the venom inflicts agonising convulsions on its victim.

**Stalker of the Dark Wolds:** Preytors are cunning and subtle creatures, adept at attacking from ambush. Instead of fitting up a Preyton on the battlefield, you may place it to one side. In your first movement phase you must set up the Preyton within 12" of the edges of the battlefield, and move them 6" from any enemy models. This is the unit's move for that movement phase.

A Carmine Dragon is a single model. Creatures saturated with the arcane power of Sigmar, they are vicious hunters, their raking claws able to shred the most armoured foe while their fangs saple with the energy of the Amethyst winds of death. Unlike most of dragons kind that are able to exhale gouts of flame or poisonous vapours, a Carmine Dragon can unleash deadly blasts of coruscating energy from its open jaws that are capable of ripping strike and blast Daemons and the Undead into nothingness.

**7 FLY**  
A Carmine Dragon can fly.

**8 KEYWORDS** ORDER, DRAGON, MONSTER, CARMINE DRAGON

**ABILITIES**  
**Shadow-dark Scales:** Each time a Carmine Dragon suffers a mortal wound, roll a D6. On a result of 5+, the mortal wound is ignored.  
**Spell Devourer:** Thanks to its innate mastery of magical forces, a Carmine Dragon can unleash one spell in the opponent's turn as if it were a wizard. If a Carmine Dragon successfully unleashes a spell, it immediately regains 1 lost wound.  
**Coruscating Blast:** A Dragon can unleash a Coruscating Blast of magical energy in your shooting phase. When it does so, pick a visible unit within 10" and roll you and D6. On a result of 5+, the mortal wound is ignored and the Bravery of the target to your opponent's. If your score is the highest, the enemy unit suffers a number of mortal wounds equal to the difference of the scores (for example, if your score was 10 and your opponent's is, the unit suffers 2 mortal wounds). If the target unit has the **DAEMON** or **DAEMON** keywords, you may re-roll your dice if you wish.  
**The Reaper's Shadow:** All other models, friend or foe, within 6" of a Carmine Dragon suffer -1 to their Bravery characteristic.

## DESCRIPTION

A Basilisk is a single model. Hate-filled and destructive creatures whose presence poisons the very ground on which they walk, Basilisks are swift and lethal reptilian predators possessed of a deadly envenomed bite and clutching claws to grasp and pull apart their victims. The Basilisk's most infamous and deadly gift however is its malignant gaze, for whatever it focus its malign attention upon dies, and before its fell gaze flesh sloughs from bone, metal blisters and plant life withers—such is the Basilisk's tainted power.

## ABILITIES

**Vitriol Taint:** In each hero phase, roll a dice for each unit that is within 3" of any **BASILISKS**. On a 6, the poisonous aura emanating from the Basilisk lays low another victim and the unit suffers a mortal wound. This ability cannot harm other **BASILISKS**.

**Malignant Gaze:** For each successful hit on a unit caused by the Basilisk's Malignant Gaze, roll a D6. On a roll of 1-3, the unit suffers 1 mortal wound. On a result of 4-5, the unit suffers 2 mortal wounds and on a roll of a 6+, the unit suffers 3 mortal wounds.

13-16	7"	12"	D6
17+	6"	10"	D6

## DESCRIPTION

A Bonegrinder Gargant is a single model. The sheer size, stupidity and propensity for drunken, ill-tempered violence of a Bonegrinder Gargant makes others of their kind seem positively mundane by comparison. Bonegrinder Gargants carry a Gargantuan Club of one sort or another with which to sweep aside entire ranks of soldiery, and can deliver a Thunderous Stomp to crush their puny foes beneath their feet. Bonegrinder Gargants are also fond of squishing their prey with Hurlled Boulders (though uprooted trees or screaming horses are just as handy as improvised missiles).

## ABILITIES

**Longshanks:** Such is its vast size that a single step for a Bonegrinder Gargant can cover an astonishing distance. When piling in, a Bonegrinder Gargant may move up to 6".

**I'll Bite Yer 'Ead Off!:** A Bonegrinder Gargant's cavernous mouth makes for an especially deadly weapon should it fancy a light snack during a battle. After piling in with a Bonegrinder Gargant, pick an enemy model other than a **MONSTER** within 2" of it and then roll 2D6. If the roll is double or higher than the enemy model's Wounds characteristic, the enemy model is slain.

**Timber!:** Should a gargant fall, it will likely crush those in its path under the weight of its enormous body. If a Bonegrinder Gargant is slain, or you roll a double when making a charge roll for a Bonegrinder Gargant, it will fall over (the charge automatically fails). Both players roll a dice, and whoever rolls highest decides in which direction the Bonegrinder Gargant falls (the player commanding the model wins any ties). Pick a point on the battlefield within 8" of the Bonegrinder Gargant and draw an imaginary straight line 1mm wide between that point and the closest part of the Bonegrinder Gargant. Every unit (friend or foe), apart from the Bonegrinder Gargant, that has models beneath this line suffers D6 mortal wounds.

## DESCRIPTION

A Carmine Dragon is a single model. Creatures saturated with the arcane power of Shyish, they are vastly potent beasts, their raking claws able to shred the most armoured foe while their fangs ripple with the energy of the Amethyst winds of death. Unlike many of dragon-kind that are able to exhale gouts of flame or poisonous vapours, a Carmine Dragon can unleash deadly blasts of coruscating energy from its open maw that are capable of ripping the souls clean from any creatures they strike and blast Daemons and the Undead into nothingness.

## FLY

A Carmine Dragon can fly.

## ABILITIES

**Shadow-dark Scales:** Each time a Carmine Dragon suffers a mortal wound, roll a D6. On a result of 5+, the mortal wound is ignored.

**Spell Devourer:** Thanks to its innate mastery of magical forces, a Carmine Dragon can unbind one spell in the opponent's turn as if it was a wizard. If a Carmine Dragon successfully unbinds a spell, it immediately regains 1 lost wound.

**Coruscating Blast:** A Dragon can unleash a Coruscating Blast of magical energy in your shooting phase. When it does so, pick a visible unit within 10" and then you and your opponent both roll a dice. Add the Carmine Dragon's Bravery to your dice roll and add the Bravery of the target to your opponent's. If your score is the highest, the enemy unit suffers a number of mortal wounds equal to the difference in the scores (for example, if your score was 10 and your opponent's 8, the unit suffers 2 mortal wounds). If the target unit has the **DEATH** or **DAEMON** keywords, you may re-roll your dice if you wish.

## DESCRIPTION

A Colossal Squig is a single model. Enormous, improbable and quite insane, these fungoid beasts possess insatiable appetites and boundless energy which, coupled with their mountainous size, means they can unleash untold havoc in battle! Their impossibly large, fleshy mouths can messily devour swathes of foes in an instant, while their rush to eat usually means anything that escapes their grisly jaws is squashed flat by the beast as it careens headlong towards its next meal.

## ABILITIES

**Avalanche of Hungry Squig:** If you roll a double when determining the Colossal Squig's charge range, re-roll hit rolls of 1 with its Trampling Feet attacks until the end of the turn.

**Swallowed Whole:** For each 6 you roll for any of your wound rolls with the Colossal Squig's Enormous Jaws attacks, D3 mortal wounds are inflicted instead of normal wounds.

**Gushing Offal:** When a Colossal Squig dies, it comes apart at the seams in an explosive tide of offal, stomach acid and half-digested victims. When a Colossal Squig is slain, roll a D6 for each unit, friend or foe, within 3". On a roll of 4+, the unit suffers D3 mortal wounds.

**Dinner's Dinner!:** Colossal Squigs are nothing if not indiscriminately hungry. If at the beginning of every combat phase there are no enemy units within 3" but there are friendly units within 3" of a Colossal Squig, roll a dice for each friendly unit within 3". On a roll of a 4+, it suffers a mortal wound as the Colossal Squig has a crafty snack.

## DESCRIPTION

The Curs'd Ettin is a single model. A huge, mutated man-like beast capable of pulverising smaller creatures underfoot with ease, the Curs'd Ettin's most fearsome weapon is its one outsized arm. Overgrown to freakish size and strength by mutation, the crushing fist of which hits with the force of a battering ram and can smash stone to powder.

## ABILITIES

**Two-headed Horror:** The Curs'd Ettin's two heads eternally bicker and scorn each other, but there is one thing they always agree upon – the need for fresh meat. A Curs'd Ettin must always try to charge an enemy unit if it is able (the owning player picks which) and can make a charge even if they have retreated or run.

**Cannibal Feast:** What the Curs'd Ettin crushes, it feasts upon and so grows stronger. The Curs'd Ettin heals D3 wounds at the end of any combat phase in which it slew enemy models with its Crushing Fist attack.

**Gibbering Curse:** The incessant gibbering arguments and insults of the Curs'd Ettin's two heads carry with them the power of Chaos to drive those who hear them insane. In each hero phase, any unit within 3" of a Curs'd Ettin may be subjected to violent madness, self-mutilation and sudden, murderous betrayal from within its ranks. Roll 2D6 for each affected unit. If the roll is higher than the unit's current Bravery characteristic, it suffers D3 mortal wounds.

## DESCRIPTION

A Dread Maw is a single model. It is a vast, reptilian worm which erupts from beneath the earth to devour its victims or crush them to pulp within its colossal writhing coils. Horrific and powerful, the Dread Maw is doubly dangerous as it often attacks from ambush, tunnelling through rock and soil as a fish swims through water, its soon-to-be meal unaware of the danger until the moment the ground beneath them begins to shake.

## ABILITIES

**It Came From Below:** Instead of setting up a Dread Maw on the battlefield, you may place it to one side. In your first movement phase you must set up the Dread Maw within 6" of the edges of the battlefield, and more than 9" from any enemy models. This is the unit's move for that movement phase.

**Reptile-worm:** A Dread Maw may ignore intervening scenery, but not enemy models as it moves.

**Yawning Doom:** On any turn in which it charges, you may re-roll the Dread Maw's hit roll of 1 with its Cavernous Maw attacks.

**Rock & Scale:** The armoured hide of the Dread Maw is all but impervious to harm, while at any given moment much of the beast is concealed beneath the earth or by a storm of debris cast up by its eruption from the ground. Whenever a Dread Maw suffers a wound or a mortal wound, roll a D6. On a roll of 4+, that wound is ignored.

Baleglyph Maul	2"	3	3+	3+	-2	1
Baleglyph Hand Weapons	1"	3	3+	4+	-1	1
Club Tail	1"	1	4+	3+	-	1

## DESCRIPTION

A unit of Fimir Warriors has 3 or more models. Fimir are loathsome, one-eyed reptilian creatures, infamously degenerate and malign and possessed of dark powers. Fimir Warriors are armoured with plates of spell-forged bronze fitted to their hunchbacked bodies and wield Baleglyph weapons in combat, either in the shape of great double-handed mauls, or single-handed maces and curving hatchets, held one in each hand. Each Fimir Warrior also has a formidable weapon in its muscular tail which ends in a natural bone club with which it can smash any foes who get in close with bone-breaking force. Each unit of Fimir Warriors may be led by a Fimirach Noble — this model has 4 attacks with its Baleglyph weapon.

## BANNER BEARERS

Models in this unit may be banner bearers. The glyph symbols of the Meargh matriarchs of the Fimir woven into their banners carry potent and malign magic. Enemy units must subtract 1 from their Bravery if within 3" of one of these banners in the Battleshock phase.

## HUNTING HORNS

Models in this unit may carry hunting horns. The eerie wail of the Fimir hunting horns has spelled doom for many down the long ages. If a unit contains any hunting horns, you may add 1 to both their run and charge rolls.

## ABILITIES

**Unnatural Flesh:** The Fimir are wholly unnatural creatures—inhuman, steeped in dark magic, ageless and able to shrug off injuries that would slay a mortal man outright. In your hero phase, any Fimir Warrior model that has been wounded but not slain is restored to full wounds.

**Baleglyphs:** Vile magic saturates the glyphs etched into the Fimir's weapons, bringing withering atrophy to anything they strike. Wound rolls of a 6 with all Baleglyph weapons inflict double damage.

**Sundering Blows:** Fimir armed with two Baleglyph hand weapons are adept at delivering a ferocious onslaught of blows which can easily smash through a foe's defences. You may re-roll hit rolls of 1 for Fimir armed with two Baleglyph hand weapons.

**Shrouding Mists:** All Fimir despise the light. They only go abroad shrouded in sorcerous mists which conceal them from its touch, and such mists also serve to hide them from the sight of their enemies. You may add 1 to the Fimir's saves against shooting attacks, and if a shooting attack inflicts a mortal wound on them, roll a D6. On a roll of a 5+, the mortal wound is ignored.

## DESCRIPTION

An Incarnate Elemental of Beasts is a single model. They are magical creatures formed of meat and bone fused and animated by the raw arcane forces of the Realm of Beasts. As such they are savage beyond imagining, their talons can rend and shred their foes with frenzied blows until little but red ruin remains, while their fearsome horns impale and gore their victims with merciless abandon. If this were not enough to signpost that these were no mere mortal creatures, the arcane forces that empower them can also be unleashed in a haze of amber energy that reaches out from the Incarnate and tears its victim's flesh as if by a myriad of invisible claws.

## ABILITIES

**Howl of the Great Beast:** The howl of this incarnation of all that hunts and kills can freeze the blood and fill all those who hear it with crippling terror. All units which take Battleshock tests within 8" of an Incarnate Elemental of Beasts suffer a -2 penalty to their Bravery characteristic.

**Amber Breath:** In the shooting phase, the Incarnate Elemental of Beasts can unleash the arcane forces within itself to savage the enemy. Pick a unit within 12" of the Incarnate Elemental of Beasts and roll a D6 to generate the number of attacks the Amber Breath inflicts. Roll a D6 for each attack. On each roll of a 5+, a mortal wound is inflicted on the unit.

**The Lure of Spilt Blood:** When an Incarnate Elemental of Beasts makes a charge against a unit which has already suffered wounds that turn, or that is part of an ongoing combat, you may re-roll their charge rolls.

**Death Frenzy:** If this model is slain in the combat phase, you can make a pile in move and then attack with the model before you remove it.

**Incarnate of Ghur:** If the battle takes place in the Realm of Beasts, the Incarnate can draw on the power of the land to heal 1 wound in each hero phase.

## DESCRIPTION

An Incarnate Elemental of Fire is a single model. They are magical creatures formed from the wantonly destructive forces of Aqshy, the Realm of Fire, and given will by its most malevolent primordial spirits. In form they are cast as a great burning figure of cinder-black flesh engulfed in robes of furnace-hot flames which whip and coil around them. The very footfall of an Incarnate Elemental of Fire brings destruction with it, as the heat that radiates off them is enough to scorch metal and kindle flesh into bright flame. In their hands they bear a pyre-blackened lance with which they can project their burning essence, either to slaughter foes at close quarters or cast burning bolts afar to incinerate their enemies.

## ABILITIES

**Ashes to Ashes:** The burning power of an Incarnate Elemental of Fire is no natural flame, but an insidious and almost wilfully destructive arcane force which eats into anything it touches, destroying them from within. Whenever a 6+ is rolled to wound with any of the Incarnate Elemental of Fire's weapons, double damage is inflicted.

**Gift of Elemental Fire:** At the end of each combat phase, all units within 3" of an Incarnate Elemental of Fire suffers D3 mortal wounds. Other **INCARNATE ELEMENTALS OF FIRE** are immune to this ability.

Their most deadly weapon however is their Brimstone Dragonfire which burns so bright that nothing but cinders remains of whatever it touches.

## DESCRIPTION

A Merwyrm is a single model. A nightmarish breed of monster of the deep oceans which is able to crawl upon land to wreak havoc in its wake, the Merwyrm is primordial kin to dragon-kind and carries within it the killing cold of the depths where light never reaches. This chill force it can exhale in deadly blasts to enfeeble and slay its warm-blooded prey, before devouring them with its hideous fang-filled jaws. Relatively ungainly and sluggish on land, its powerful tail can also be used as a powerful weapon to snap bones and crush anything that dares to get close.

## ABILITIES

**Voracious Hunger:** At the end of any combat phase in which the Merwyrm inflicted wounds with its Hideous Jaws, it may heal D3 wounds.

**Sea Beast:** A Merwyrm ignores the effects of all water and swamp-type scenery when it moves, effectively passing across them as if they were open ground.

**Stench of the Deep:** The air around this beast is filled with an unholy stench of rotting flesh and the brackish filth of the deepest sea abysses. Subtract 1 from the hit rolls of attacks made against the Merwyrm.

**Abyssal Predator:** The Merwyrm's usual prey are the leviathans of the deep, and against such mighty beasts it has learned to latch on and tear great chunks of flesh away from its victims. When attacking any **MONSTER** model with its Hideous Jaws, if a 6+ is rolled to wound, rather than rolling for damage normally, 3 mortal wounds are inflicted instead.

## DESCRIPTION

A Mourngul is a single model. A terrifying, inhuman spectre of monstrous size, the Mourngul attacks with its Nightmarish Claws and Fangs in a frenzied hunger for flesh and souls.

## FLY

A Mourngul can fly.

## ABILITIES

**Devourer of Flesh and Souls:** The unholy essence of a Mourngul is nourished by the souls of those it devours. If a Mourngul slays any models, at the end of that combat phase, heal D3 wounds that have been allocated to it.

**Ghastly Apparition:** Mourngul are a soul-searing horror to look upon, radiating an aura of supernatural terror, unutterable despair and ravenous hunger. Subtract 1 from hit rolls for attacks made by enemy units while they are within 6" of any models with this ability.

**Haunter of the Dark:** Mourngul are spectral creatures, made more of shadow and icy fogs than physical substance. Ignore the attacking weapon's Rend characteristic when making save rolls for this model. In addition, roll a dice each time you allocate a wound or mortal wound to this model. On a 5+, the wound is negated.

**Ravenging Onslaught:** Once a Mourngul begins a blood-mad feeding frenzy, there is almost no stopping it. Each time you roll a hit roll of 6+ for a Mourngul's Nightmarish Claws and Fangs, add 1 to the weapon's Damage characteristic for that attack.

## MAGIC

**DEATH WIZARDS** know the Summon Mourngul spell in addition to any other spells they know.

## SUMMON MOURNGUL

Summon Mourngul has a casting value of 10. If successfully cast, you can set up a Mourngul within 18" of the caster and more than 9" from any enemy models. The unit is added to your army, but cannot move in the following movement phase.

Grots' Stickers and Bashers	1"	3	5+	5+	-	1
Cavernous Maw	1"	3	3+	3+	-2	D3

## DESCRIPTION

A Squig Gobba is a single model, consisting of an especially large and jowly Squig along with its Grot handlers, who prod, provoke and generally do their best to encourage their enormous charge to do its job. The Gobba itself can, with an extremely varied degree of success, fire narcotically infused Spit-Squigs in the rough direction of the enemy. Thanks to their force-fed diet of noxious mushrooms, these unfortunate – if oblivious – creatures explode into poisonous slime when they crash down amongst their victims. If any foes should stray too close, the Grots who attend it will attempt to defend their charge with a variety of Stickers and Bashers; that is, assuming the Squig Gobba itself doesn't gobble them up first with its Cavernous Maw!

## ABILITIES

**Arcing Spit:** Once gobbled forth, the flailing Spit-Squigs soar in an uncharacteristically graceful, saliva-trailing arc before messily splatting amongst their victims. This model can shoot at enemy units that are not visible to it.

**Spittin' Beast:** The Grot 'crew' tether their Squig Gobba to the ground with stakes to provide a rudimentary form of stability, and relocating the enormous creature takes time and inevitably disrupts the spittin' process. The Squig Gobba cannot make charge moves or pile-in moves. In addition, add 1 to hit rolls made for this model's Spit-Squigs on a turn in which it did not move.

MELEE WEAPONS	Range	Attacks	To Hit	To Wound	Rend	Damage
Venom-dripping Fangs	1"	4	3+	3+	-1	2

## DESCRIPTION

A Preyton is a single model. Twisted creatures of Chaos, Preyton are hateful and cunning beasts that delight in carnage and killing for its own sake. They possess powerfully venomous saliva which drips from their fangs incessantly and which they can also spit at their enemies to blind and agonize them so they are helpless before their onslaught. When they attack, they charge headlong with their blackened and serrated antlers to crash into their foes before falling upon them with their vicious fangs.

## FLY

Preyton can fly on their leathery wings.

## ABILITIES

**Blinding Bile:** If a unit suffers wounds from a Preyton's Blinding Bile attack, you must subtract 1 from its hit rolls until your next hero phase.

**Goring Charge:** Whenever a Preyton charges into combat, it inflicts 2 mortal wounds on the unit it has charged at the beginning of the combat phase. It will then go on to attack normally.

**Agonizing Venom:** Should a model suffer wounds from a Preyton's Venom-dripping Fangs but is not slain, at the end of the combat phase roll a D6. On a result of a 4+, the model suffers a mortal wound as the venom inflicts agonizing convulsions on its victim.

**Stalker of the Dark Wilds:** Preytons are cunning and sadistic creatures, adept at attacking from ambush. Instead of setting up a Preyton on the battlefield, you may place it to one side. In your first movement phase you must set up the Preyton within 12" of the edges of the battlefield, and more than 8" from any enemy models. This is the unit's move for that movement phase.

## DESCRIPTION

A Rogue Idol is a single model. This monstrous effigy crushes its foes into a bloody pulp with its Boulder Fists and Stompin' Feet.

## ABILITIES

**Da Big 'Un:** *Nothing more, in truth, than a monumental pile of rock and detritus in motion, a Rogue Idol has few weaknesses and does not feel pain.* Halve the Damage characteristic (rounding up) of weapons that target this model. In addition, halve the number of mortal wounds it suffers from a spell or ability (rounding up).

**Spirit of the Waaagh!** *Rogue Idols storm relentlessly into battle, driven ever onwards by the will of Gorkamorka, smashing their enemies flat with one thunderous charge after another.* A Rogue Idol can never retreat. In addition, you can re-roll failed hit rolls for this model's Boulder Fists if it made a charge move in the same turn.

**Livin' Idol:** *The crackling spiritual power of the Waaagh! is the lifeblood of the idol.* Add 1 to casting rolls for friendly **ORRUK WIZARDS** and **GROT WIZARDS** while they are within 16" of this model. In addition, add 1 to the Bravery characteristic of friendly **ORRUK** and **GROT** units while they are wholly within 16" of this model. However, if a Rogue Idol is slain, subtract 1 from the Bravery characteristic of all friendly **ORRUK** and **GROT** on the battlefield for the rest of the game.

**Rubble and Ruin:** *A Rogue Idol doesn't particularly care where it's treading, chunks of stone and bits of former victims are forever falling off its thunderous bulk.* At the end of your movement phase, roll a dice for each unit (friend or foe), within 3" of this model. On a 4+, that unit suffers 1 mortal wound.

**Avalanche!** *Even in death, Rogue Idols cause widespread devastation, their stony forms collapsing in a rain of rubble that has left more than one elated champion crushed flat by the remains of the very beast he just bested.* When this model is slain, roll a dice for each unit (friend or foe), within 3" of this model before removing it; on a 4+, that unit suffers D3 mortal wounds.

## ABILITIES

**Imposing Mount:** The sight of the Warlord riding such an imposing and blessed beast into battle does wonders for the uncertain loyalty of the Skaven around them. Add 1 to the Bravery characteristic of friendly **VERMINUS** models while they are within 13" of any Skaven Warlord on Brood Horror models.

14+	4"	2	4+

## DESCRIPTION

A Troggoth Hag is a single model. A colossal river troggoth, the Troggoth Hag is both rapaciously hungry and all but impossible to kill. As well as being far more clever and dangerous than her kin, she is possessed not only of malign cunning but also innate arcane power drawn from the foetid rivers and swamps in which she dwells. The Troggoth Hag can pulverise her victims with her Deadwood Staff and squash them beneath her Crushing Bulk. An even worse fate awaits those the Troggoth Hag sprays with her Copious Vomit – they are condemned to a horrific, agonising death as their armour, flesh and bone are dissolved by her noxious bile.

## ABILITIES

**Hag Regeneration:** All Troggoths share an innate ability to regenerate even the most grievous of injuries, and in the case of a Troggoth Hag this trait is augmented further still by the arcane energies coursing through her hulking physique. In each of your hero phases, heal D6 wounds that have been allocated to this model.

**Spell-spite:** Troggoth Hags carry many strange fetishes and weird and gory relics of their past victims, often held in a decaying fisherman's net repurposed as a sack. These fetishes and carrion fragments serve as a focus for their cursed powers and can bring down a malignant hex upon those that would dare wield any hostile magic against them. Each time you successfully unbind a spell with this model, roll a dice; on a 4+ the wizard that cast that spell immediately suffers D3 mortal wounds.

**Terrible Stench:** So foul is the foetid smell given off by Troggoth Hags that even the most doughty warrior will retch uncontrollably in their presence. Subtract 1 from hit rolls for melee weapons that target this model.

## MAGIC

A Troggoth Hag is a **WIZARD**. She can attempt to cast one spell in each of your hero phases, and attempt to unbind one spell in each enemy hero phase. She knows the Arcane Bolt, Mystic Shield and Troggoth Hag's Curse spells.

### TROGGOTH HAG'S CURSE

The cackling curses of the Troggoth Hag are insidious and vile, robbing her victims of strength and shackling them with ill fortune; all the better to prevent her victims from escaping. The Troggoth Hag's Curse has a casting value of 7. If successfully cast, pick an enemy unit that is within 12" of the caster and visible to her. Subtract 1 from any hit rolls and save rolls made for that unit until your next hero phase.

## DESCRIPTION

A Warpfire Dragon is a single model. Members of a rare, twisted and malformed branch of dragon-kind, their limbs end in twisted and barbed claws, while their mouth is filled with row after row of jagged teeth dripping with caustic saliva with which they can shred their prey. Spite-filled and ruinous creatures, they delight in destroying and mutilating their foes with blasts of Warpfire exhaled from the burning morass of ruinous energies that seethe within their bodies, the mere proximity to which can kill. Even in death are these mutated creatures deadly as their demise brings about a raging blast of unleashed fire to scorch the land around them.

## FLY

A Warpfire Dragon can fly.

## ABILITIES

**Warfire:** A Warpfire Dragon can unleash a Coruscating Blast of Warpfire in your shooting phase. When it does so, pick a visible unit within 12" and roll a dice. On a roll of a 1, that unit suffers a single mortal wound. On a roll of a 2-4, that unit suffers D3 mortal wounds. On a roll of 5-6, that unit suffers D6 mortal wounds.

In addition, after any models are slain by the mortal wounds, any affected unit which survives immediately suffers a number of additional hits equal to the number of models that have been slain as the victims explode in hellish flames. These additional hits wound on a roll of 5+ with a Rend characteristic of - and a Damage characteristic of 1. So, for example, if the initial Warpfire attack caused 3 models to be removed from a unit, 3 additional hits would be caused on the survivors of that unit.

**Malign Aura:** In your hero phase, roll a D6 for every model, friend or foe, within 3" of a Warpfire Dragon. On a roll of a 6+, that model suffers a mortal wound.

**Deadly Demise:** When a Warpfire Dragon is slain, roll a D6 before removing it from the game. The result of this roll in inches is the blast radius of its explosive demise. Roll a D6 for each model, friend or foe, within this distance of the Warpfire Dragon. On a result of a 5+, that model suffers a mortal wound.
